Synergistic Activities

- **Research Tools:** Principal author of SAGE (over 100000 lines of new code), which is a major new piece of software. Author of the modular forms, modular symbols and modular abelian varieties parts of the Magma computer algebra system (425 pages (26000 lines) of code plus documentation). These are tools used by mathematicians who do computations with modular forms.
- **Databases:** Created and maintain the Modular Forms Database. This contains continually expanding data about elliptic curves and modular forms: <http://modular.math.washington.edu/Tables/>.
- **Outside Service:** IDA/CCR consultant. Also, Defense Science Study Group member 2002–2003: DSSG is a DARPA funded program administered by the Institute for Defense Analysis; paper on GPS vulnerabilities.
- **Outreach:** SIMUW 2006; Canada/USA MathCamp mentor (2002); Several Math Circles talks in Boston.
